statista

Vices domiciled on the Internet

How can we make the Internet Safer

Keep Personal
Information Private

Do Not click

Have Good Anti Virus

Be Cautious

Password Management

Avoid Untrusted Apps

Use Secure Internet
Connection

Make Regular backups

Update Regularly

Catchup

01

Keep Personal Information Private

Review and update default
privacy settings

Closed unused accounts.

Be Careful Who You Meet Online

0 0

Destroy documents not used that
contain sensitive Information

02

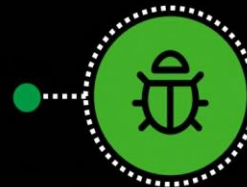

Have Good Anti Virus

AD Blockers

Make use of Ad Blockers to prevent your computer or phone from being infested with Adware

Anti Malware

To provide a general security from most known forms of malware

Anti Spyware

Protect yourself from spyware when on line

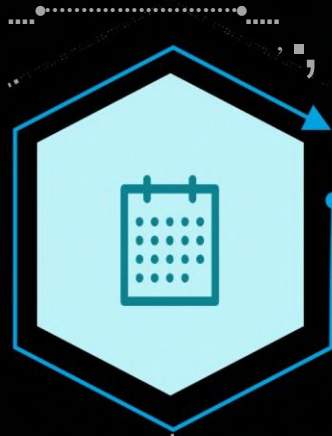

03

Password Management

Complex and
strong passwords.

Change your password
often

Activate Two/Multi
Factor
Authentication

Do not use the same
password for everything
and do not let your
browser remember your
login details

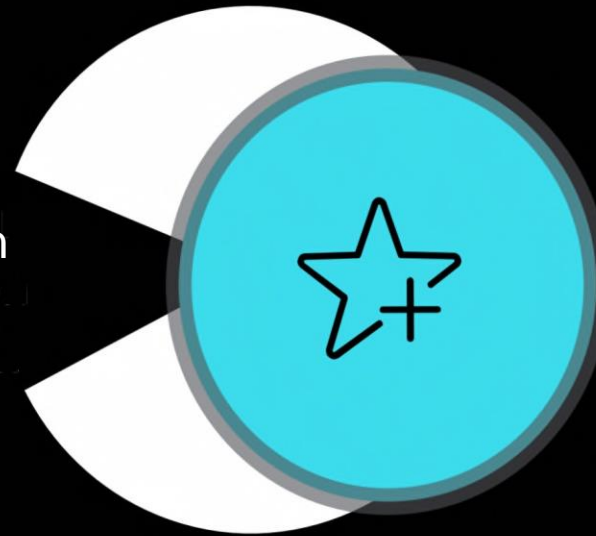

04

Use Secure Internet Connection

Hackers can monitor
and steal information
in unsecure network

Use a VPN for sensitive
transactions

05

Update your apps and OS regularly

1

Make sure the
software or apps
you use
are
supported

2

Using the latest
version of your
device OS.

06

Do not click on links from unknown sources - Avoid them!

Be watchful of links that do not start with "https".

Avoid clicking links in emails

Avoid clicking adverts saying you have won something

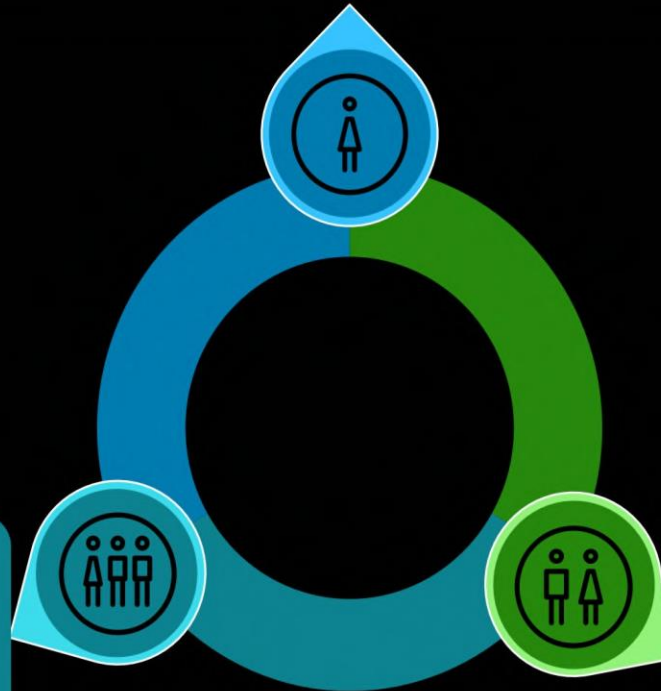

Verify the authenticity first before clicking on any link shared with you.

07

Be Cautious Of what you share on Social Media

Don't share personal details

Update your privacy
settings

Avoid untrusted apps regardless of the service promised

Some of these apps violate system permissions

Some of these apps are loaded with malware of various kinds.

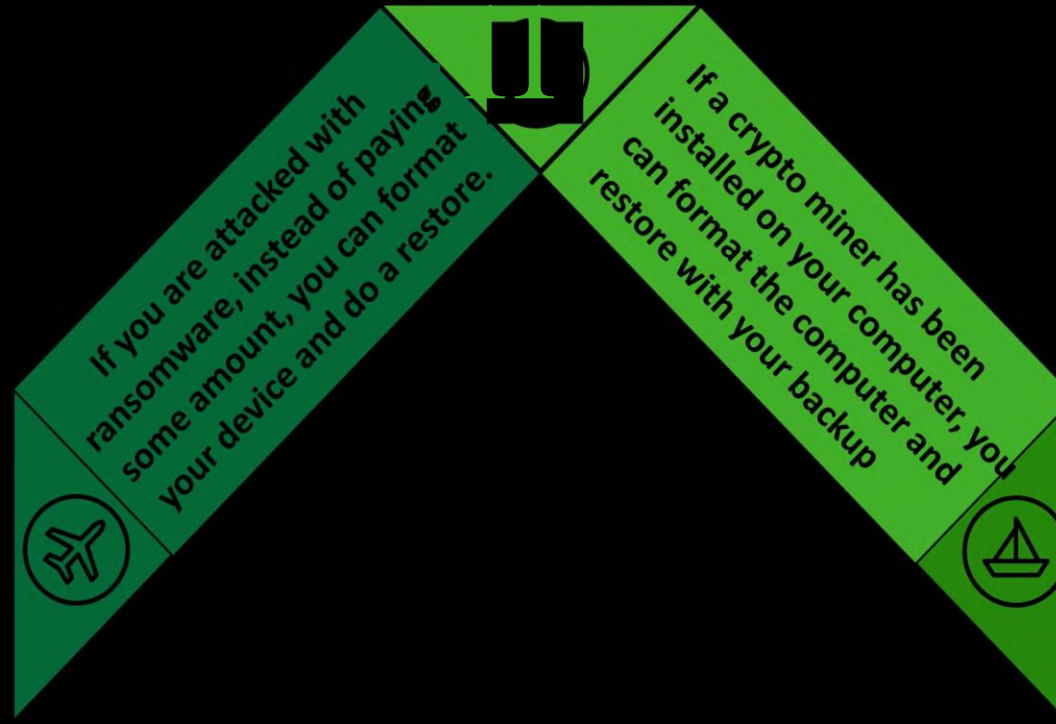

Some of these apps can be used to steal funds from some payment platforms

Some of these apps can introduce a ransomware to your PC or mobile

09

Make Regular backups of your important files

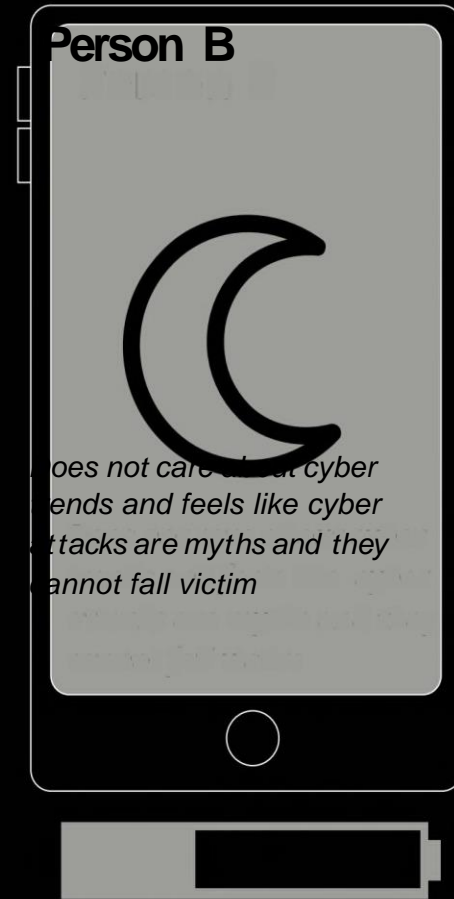

However, you should make sure that your backup is kept safe, secure and at off-site

10

Catchup Regularly with cyber trends

Person A
Keeps up with all cyber trends and best practices so as to stay protected always

Person B
Does not care about cyber trends and feels like cyber attacks are myths and they cannot fall victim

Conclusion

Do your part. Do not be the weak link.

THANK YOU |

Thank you for the opportunity to participate in the workshop with you. We hope you found the session informative and useful. We will continue to work with you to ensure the highest level of cyber security for your organization. We will be in touch with you again in the future to discuss the next steps in our partnership. We will be in touch with you again in the future to discuss the next steps in our partnership. We will be in touch with you again in the future to discuss the next steps in our partnership.
